

SLIMLINE VIDEO CAMERA

This camera is designed to survey both narrow boreholes and those with a narrow access hole. This camera is ideally suited for in-situ rising main or pump inspections and fishing/recovery operations. The camera has a down hole facing, very wide angle lens, which allows a detailed overview of the borehole to be recorded.

The survey is recorded onto both DVD and computer hard drive - the DVD is available at the end of the survey for the client to take away.

Rising main join in 600mm id plain steel lined borehole

Cascading water through perforations

3m diameter well

Unlined chalk bore-600mm

Specifications

| | |
|------------------|------------|
| Size: | 650 x 41mm |
| Weight: | 6.5kg |
| Max.temperature: | 80°C |
| Max. pressure: | 60Bar |

Borehole Conditions

Diameter 50 - 60mm
Dry or **clear water** filled
Unlined, plastic or steel lined

Logging Conditions

2-9 m/min
Free running or centralised
